

Nour Mahmoud

1028 Harvey Johnson Rd. | Raleigh, NC 27603
(984) 683-3550 | nhmahmou@ncsu.edu | [LinkedIn](#)

Objective

CS student at NC State (4.0 GPA, May 2026) skilled in Java, Python, C/C++, SQL, and JavaScript. Experienced in research, mentoring, and full-stack development. Seeking a Software Engineer New Grad role to apply and grow technical skills.

Education

North Carolina State University | Raleigh, North Carolina May 2026
Bachelor of Computer Science | GPA: 4.0 / 4.0
Relevant Coursework: Data Structures (Java), OS (C), Intro to AI (Java), HCI, Game Engines, Graphics

Experience

Research Assistant, NSF REU Program (HCI) | Volunteer | Raleigh, NC May 2025 – Present

- Conducted research into collaborative coding, annotating 2,700 dialogue turns from ten student teams using Python & Jupyter; achieved inter-rater agreement (Jaccard similarity > .80)
- Uncovered patterns in decision-making tied to reduced debugging time, through statistical interpretation and iterative labeling
- Co-authored a research paper based on these findings and submitted to the ACM CHI Conference on Human Factors in Computing Systems (CHI 2026)

Computer Science Ambassador | Volunteer | Raleigh, NC August 2024 - Present

- Represented the CSC department in outreach, campus tours, and events; communicated complex technical topics to prospective students & families
- Coordinated with faculty/staff and peer teams to plan and execute events smoothly

North Carolina State University | Teacher Assistant Senate Member | Raleigh, NC August 2024 - Present

- Led 5+ GitHub workshops to increase technical fluency across Computer Science courses
- Researched the impact of undergraduate vs. graduate TAs; proposed data-driven course-level improvements to support peer learning and enhance outcomes

North Carolina State University | Teacher Assistant (TA) | Raleigh, NC August 2023 - Present

- TA for Intro to Java and Data Structures & Algorithms, mentoring 400+ students from entry-level to advanced coursework
- Guided students through in-depth debugging and complex concepts such as recursion, sorting algorithms, and data structure implementation
- Provided clear, rubric-based feedback to strengthen problem-solving and coding practices
- Collaborated with faculty and staff to refine instruction and promote inclusive, supportive learning environments.

Projects

CoffeeMaker Web Application | Java, Javascript, Spring Boot, REST, Maven, Hibernate, Tomcat

- Built a full-stack management system with a RESTful backend and dynamic web frontend
- Implemented persistence using Hibernate ORM with MySQL, managing recipes and inventory
- Applied agile methodologies, GitHub workflows, and test-driven development with JUnit
- Collaborated with a multi-member team to deliver features: recipe creation and inventory validation

Technical Skills

- **Programming Languages:** Python, Java, SQL, JavaScript, C++, C
- **Frameworks & Tools:** React, Spring, Hibernate, Tomcat, Vite, ZeroMQ, JUnit, Maven
- **Concepts:** Data Structures, Algorithms, Multithreading, Networking, A* Search, REST APIs, Agile/Waterfall
- **Environments:** Unix/Linux, Git & GitHub, Jupyter, VS Code, Eclipse, CUDA
