Battlezone: Neon Assault

Battlezone: Neon Assault is an arcade-style tank game set inside a glowing wireframe battlefield where every object is outlined in vibrant neon. Enemies spawn around the arena and dynamically chase the player using obstacle-aware steering, collision avoidance, and upgraded wave-based enemy logic that grows more challenging over time. The player navigates through neon obstacles, dodges bullets, and relies on an upgraded radar system to track incoming threats with greater clarity. Survival depends on fast movement, precise aiming, strategic use of upgrades, and adapting to the constantly shifting patterns of glowing enemies.
